

What else does Revolution Plus do?
Well I'm so glad you asked!
Today let's talk about heartworms
And why they shouldn't last

A heartworm is a parasite
That lives in mosquitoes
And where we live in New Orleans
They breed and bite in droves

Mosquitoes hunt with heat you see
And cats' bodies run warm
So when they get inside your house
It's to your cat they'll swarm

And when your cat gets bitten
And infected with heartworms
It's different than it is with dogs
And causes much more harm

It's hard to diagnose
And there's no good treatment for cats
So that's why Revolution Plus
Is what your cat needs, STAT!
